

GLASS PANES

We offer many types of glass panes that are characterised by the highest quality of workmanship. Choose panes for your windows that will meet your expectations and give your interior unique character.

We have been manufacturing multiple glazed panes since 1994. We have a state-of-the-art glass tempering plant and our own research laboratories, which ensure the highest quality.

The glazed units we manufacture can be fitted with special capillaries to equalise the pressure inside the glass with atmospheric pressure. Thanks to this solution, the glazing packages will perform perfectly in your premises.

Option to sandblast the glass in any way you wish (in 3 shades of grey)* or to use ready-made designs.

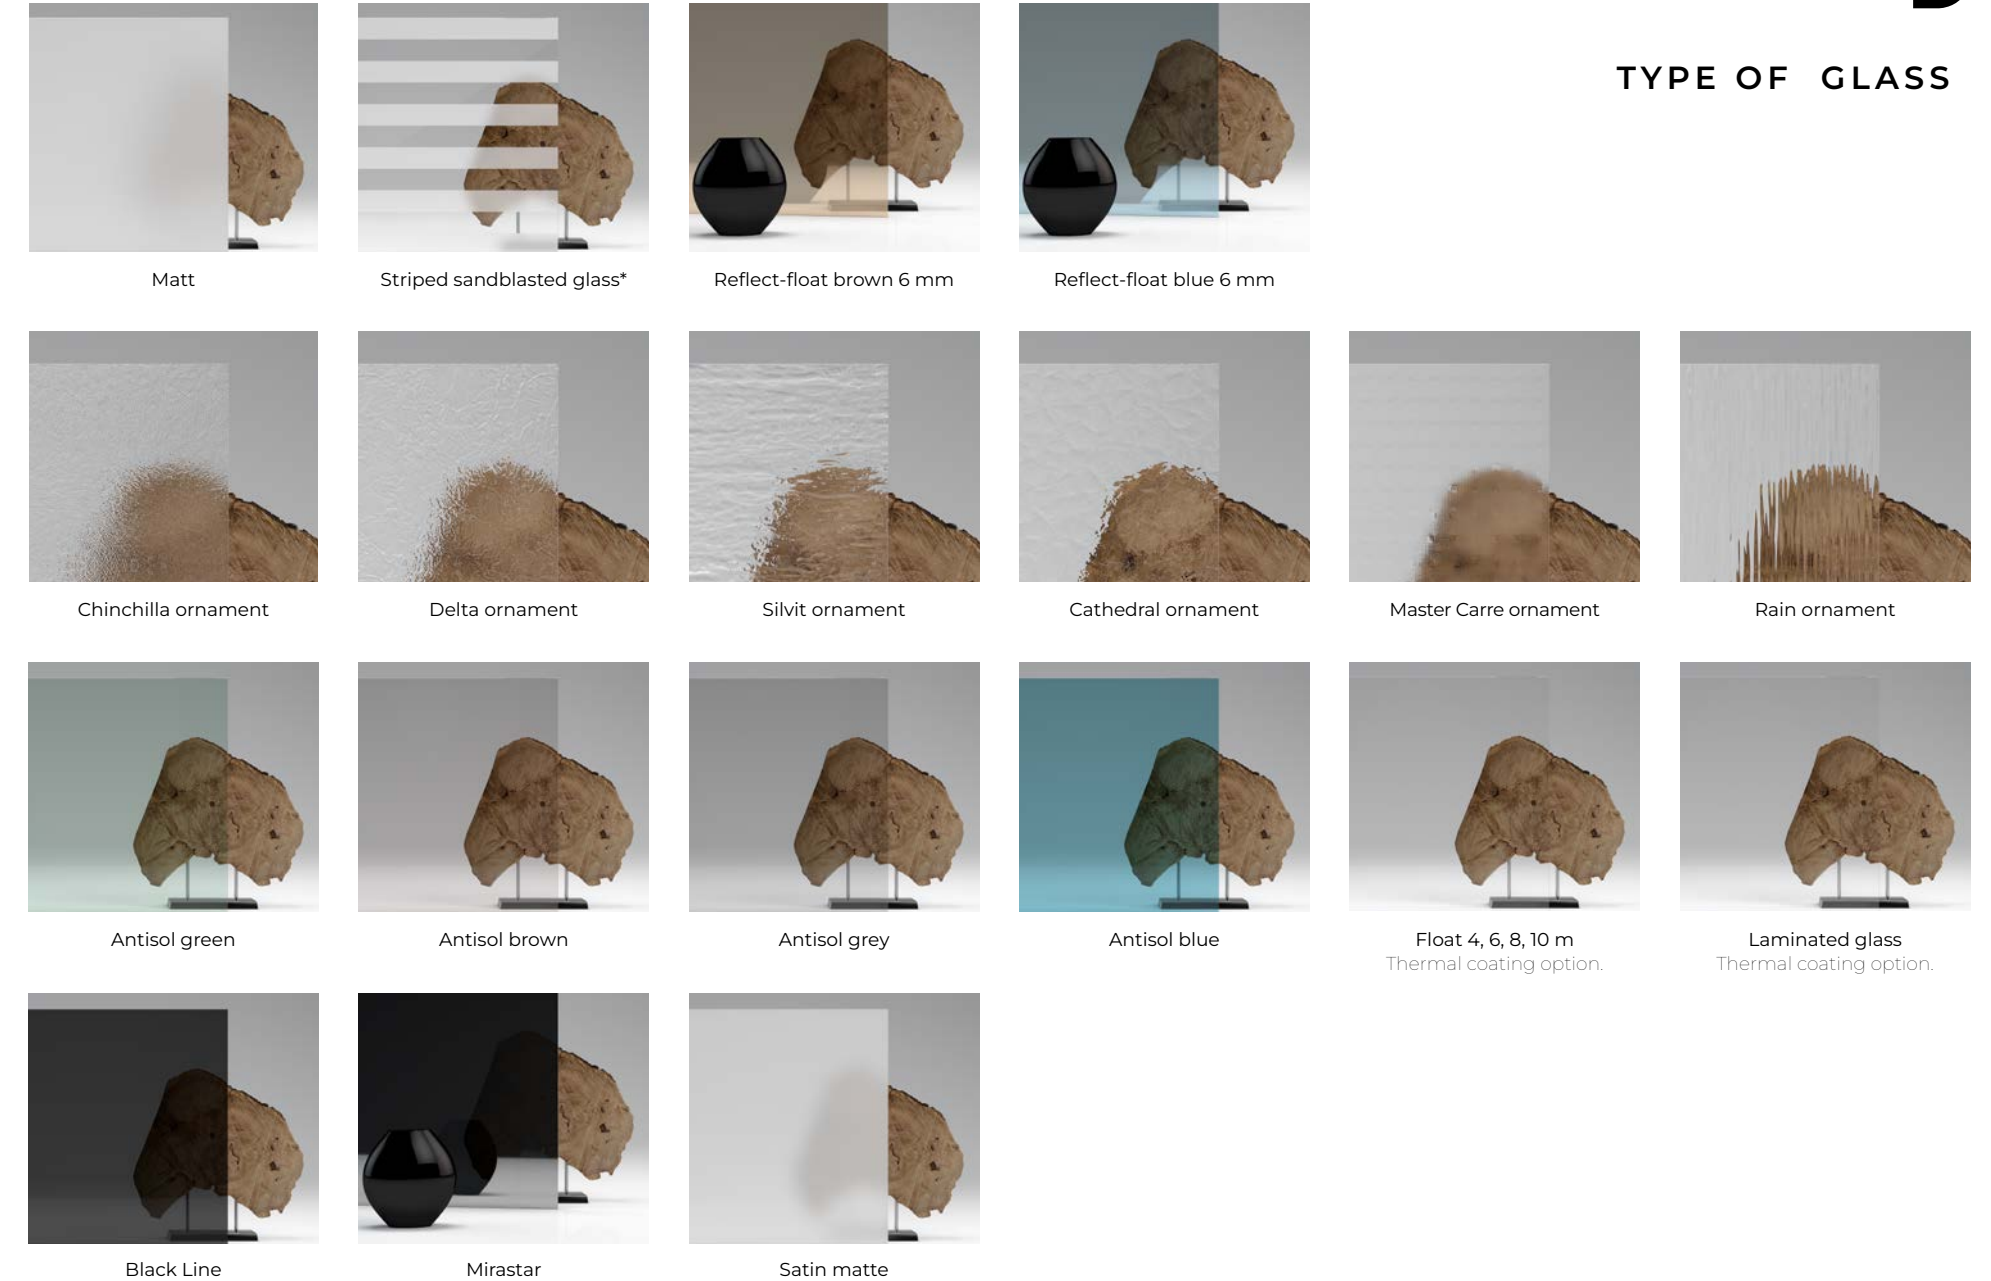

INFILLING MATERIAL

- **ARGON** - all glazed units are infilled with argon gas as standard, which guarantees very good thermal insulation. This has resulted in glazed units with Ug value of between 1.1 and 0.5 W/(m²K).

3-pane (2-chamber) 48 mm units with glass-pane spacer made of galvanised steel.

TYPE OF GLASS

* For sandblasting, contact Drutex's Technology Department or ask your dealer.
